Full job description

Job Summary

We are seeking a skilled Electrician to join our team. The ideal candidate will have experience in both residential and light commercial electrical systems, with a strong understanding of electrical schematics and the National Electrical Code (NEC). This role requires proficiency in low-voltage systems, as well as the ability to read blueprints and work with various hand and power tools. The Electrician will be responsible for installing, maintaining, and repairing electrical systems while ensuring compliance with safety standards.

Responsibilities

- Install, maintain, and repair electrical wiring, equipment, and fixtures in accordance with NEC standards.
- Read and interpret blueprints and schematics to determine the layout of electrical systems.

- Troubleshoot electrical issues using voltmeters, ohmmeters, and other diagnostic tools.
- Collaborate with other tradespeople to ensure efficient project completion.
- Perform routine maintenance on electrical systems to prevent breakdowns.
- Ensure all work complies with local building codes and safety regulations.
- Document all work performed and maintain accurate records of repairs and installations.

Skills

- Proficient in reading schematics and blueprints related to electrical systems.
- Strong knowledge of NEC regulations and low voltage systems.
- Experience as an industrial electrician is preferred.
- Familiarity with hand tools and power tools used in electrical work.
- Ability to effectively use diagnostic equipment such as voltmeters and ohmmeters.
- Strong problem-solving skills and attention to detail.
- Excellent communication skills for collaborating with team members and clients.

Join our team of dedicated professionals and contribute your expertise as an Electrician in a dynamic work environment!
